

Muskan Dodmani

Backend Engineer | Node.js | Express.js | MongoDB

Goa, India | muskandodmani222@gmail.com | +91 72497 99306 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Backend engineer with 1.5 years building Node.js/Express APIs in production. Focused on job queues, event-driven architecture, schema design, and async workflows. Most of my work has been owning features from API design to deployment in a live SaaS product.

TECHNICAL SKILLS

Backend: Node.js, TypeScript, Express.js, REST API Design, MongoDB, Mongoose, JWT Authentication, Redis, BullMQ, API Validation (Yup), Error Handling

System Concepts: Event-Driven Design (EventEmitters), Schema Design, Middleware Engineering

Tools & Platforms: Git/GitHub, Postman, AWS S3, Cloudinary, Netlify, Vercel

Frontend (Collaborative): React.js, Redux Toolkit, TanStack Query

WORK EXPERIENCE

Associate Software Engineer | BIZ Nest, Panaji, Goa

Apr 2025 – Present

BIZNest SaaS Platform | Internal company management tool (34+ users)

- Replaced synchronous report generation with a BullMQ + Redis job queue, adding cancellation, retry logic, and status polling so long-running reports no longer blocked the API.
- Decoupled audit logging from request handlers using Node.js EventEmitters, processing 500+ daily user events without adding latency to core operations.

Nomad Spaces | Traveler workspace and hospitality discovery platform

- Designed multi-step host signup flow with interim Google Sheets integration for sales team verification before secure DB commit, including Yup validation layers.
- Developed user profile, likes, and reviews APIs with structured MongoDB schemas, resulting in API integrations with error-resilient endpoints.

Nomad Admin & Host Portal | Admin and host-facing management system for the Nomad ecosystem

- Replaced in-memory CSV loading with a Node.js Streams pipeline, processing ~1K records per upload with row-level error isolation, cutting debugging time significantly.
- Built AWS S3 image upload flow with file type validation and structured key naming for consistent retrieval.

Software Engineer Intern | BIZ Nest, Panaji, Goa

Dec 2024 – Apr 2025

BIZNest SaaS Platform | Internal company management tool (34+ users)

- Shipped modules including analytics dashboards (tailored for 7 departments), attendance tracking, ticket workflows, meeting scheduling, and leave management with MongoDB aggregation pipelines, reducing query complexity on the frontend.

EDUCATION**Bachelor of Computer Applications | Don Bosco College, Panaji**

Aug 2020 – May 2023

CGPA: 8.94/10
