

Muskan Dodmani

Backend Engineer | Node.js | Express.js | MongoDB

Goa, India | muskandodmani222@gmail.com | +91 72497 99306 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Backend Engineer with 1.5+ year shipping Node.js/Express REST APIs with MongoDB schemas and JWT, RBAC for SaaS platforms. Owned 15+ features end-to-end from design to deployment, with depth in event-driven systems, error handling, and modular backend architecture.

TECHNICAL SKILLS

Backend: Node.js, TypeScript, Express.js, REST API Design, MongoDB, Mongoose, JWT Authentication, Redis, BullMQ, Docker, API Validation (Yup), Error Handling

System Concepts: Event-Driven Design (EventEmitters), Schema Design, Middleware Engineering, Modular Backend Structure, Multi-Tenant Architecture

Tools & Platforms: Git/GitHub, Postman, AWS S3, Cloudinary, Netlify, Vercel

Frontend (Collaborative): React.js, Redux Toolkit, TanStack Query, Tailwind CSS, HTML5, CSS3

EXPERIENCE

Associate Software Engineer | BIZNest, Panaji, Goa

Apr 2025 – Present

- Designed flexible MongoDB schemas and modular Express controllers to adapt to evolving requirements without breaking validation or security layers, supporting 10K+ documents across collections for 34+ users.
- Built a report generation module using Redis as a message broker and BullMQ for background job processing, enabling report generation, cancellation, retry handling, and more reliable async workflows.
- Engineered event-driven architecture using Node.js EventEmitters to decouple side effects like logging and notifications from core request handlers, processing 500+ daily events.

Software Engineer Intern | BIZNest, Panaji, Goa

Dec 2024 – Apr 2025

- Developed task assignment, tracking, ticket management, leave requests, and meeting scheduling features with full CRUD operations and role-based visibility.
- Tested and validated features with dev team for internal workflows, ensuring error handling consistency across all endpoints.

PRODUCTION ENGINEERING

BIZNest SaaS Platform | Internal company management tool (34+ users)

- Shipped modules including analytics dashboards (tailored for 7 departments), attendance tracking, ticket workflows, meeting scheduling, and leave management with optimized MongoDB queries for efficient data retrieval.
- Built async log system backend using Node.js EventEmitters to capture and persist user actions for audit compliance.

Nomad Platform | Connects travelers with coworking spaces, coliving, meeting rooms and cafes

- Designed multi-step host signup flow with interim Google Sheets integration for sales team verification before secure DB commit, including Yup validation layers.
- Developed likes, user profile, and reviews backend APIs with structured MongoDB schemas and validation, handling dev-team interactions with error-resilient endpoints.

Master Panel & Host Panel | Internal admin and multi-tenant host-facing management for Nomad ecosystem

- Built bulk CSV upload controllers via Node.js streams for large-scale data ingestion (~1K records per upload) with built-in error handling for failed parses.
- Implemented image upload and management flows integrated with AWS S3.

EDUCATION

Bachelor of Computer Applications | Don Bosco College, Panaji Aug 2020 – May 2023
CGPA: 8.94/10
